

PRIMER PLUS

Primer for internal and external walls

.....

PRIMER PLUS enables bonding on all concrete, mortar, gypsum, wood, stone, clay bricks or light-weight concrete substrates. It is also possible to apply PRIMER PLUS on clean paints inside or outside.

Properties

- PRIMER PLUS prepares many porous or non-porous substrates before application of a lime product
- PRIMER PLUS is perfect when combined with lime paints such as CENTRI STORICI. It regulates the background
- To be applied with a spray or a brush
- It can be covered after 1 hour (maximum 5 days). This is a great advantage when organizing the works schedule
- Compatible with hydrated lime and natural hydraulic lime

Related products

- CENTRI STORICI
- NHL

Uses

Prepares difficult backgrounds before application of a lime mix, both inside and outside

Contraindications

- Do not apply outside the following temperatures: 5°C to 30°C
- Do not apply neat but always dilute it with water (1 L for 6 to 8 L of water depending on the porosity of the background)

Packaging

5-kg buckets

Consumption

4 to 6 m²/L depending on the substrate
